LEVANT
SECURITY

COMPANY
PROFILE

Security for people, property and business.

Levant Security combines security officers, remote monitoring and specialist protection for residential, commercial and industrial properties.

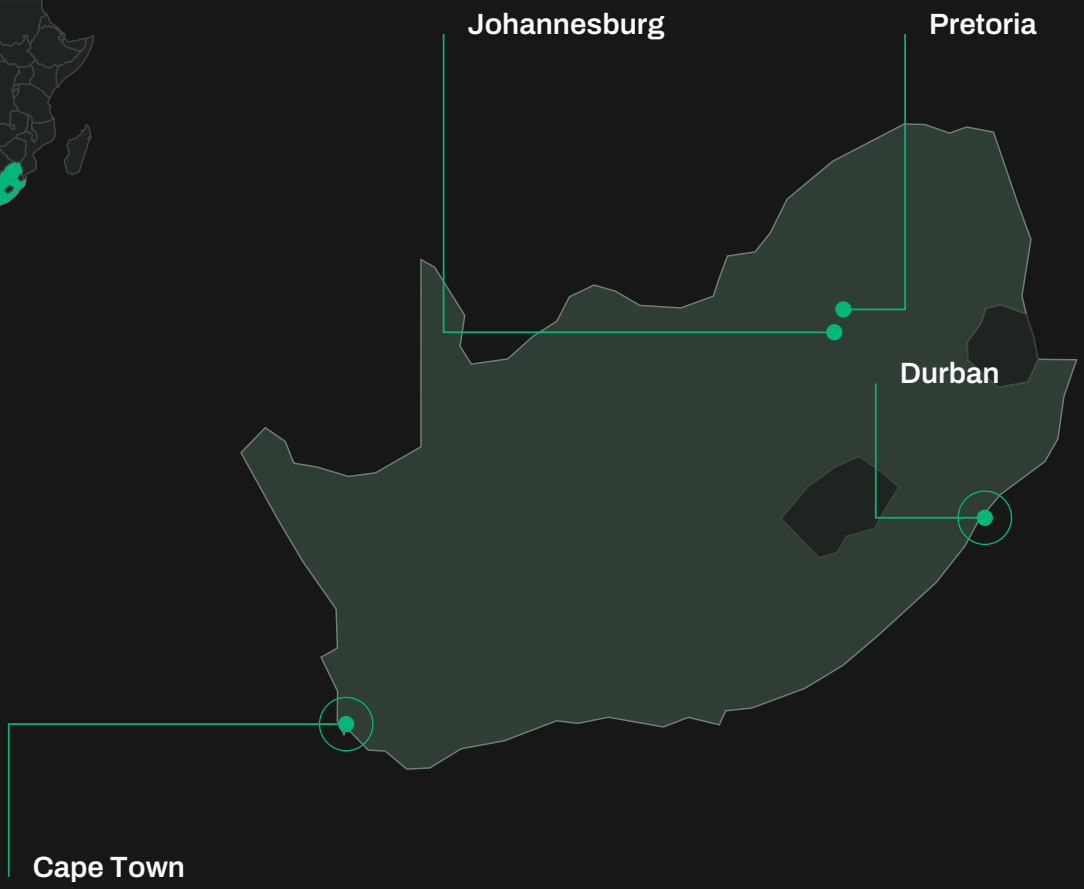

Our presence

Our presence in Durban, Johannesburg, Cape Town and Pretoria connects on-site security with command centre support.

CCTV and surveillance

Cameras and intrusion alerts help controllers identify and assess threats. They review the relevant footage and follow established response procedures tailored to your property's security requirements.

AT THE PERIMETER

Perimeter surveillance

Camera coverage

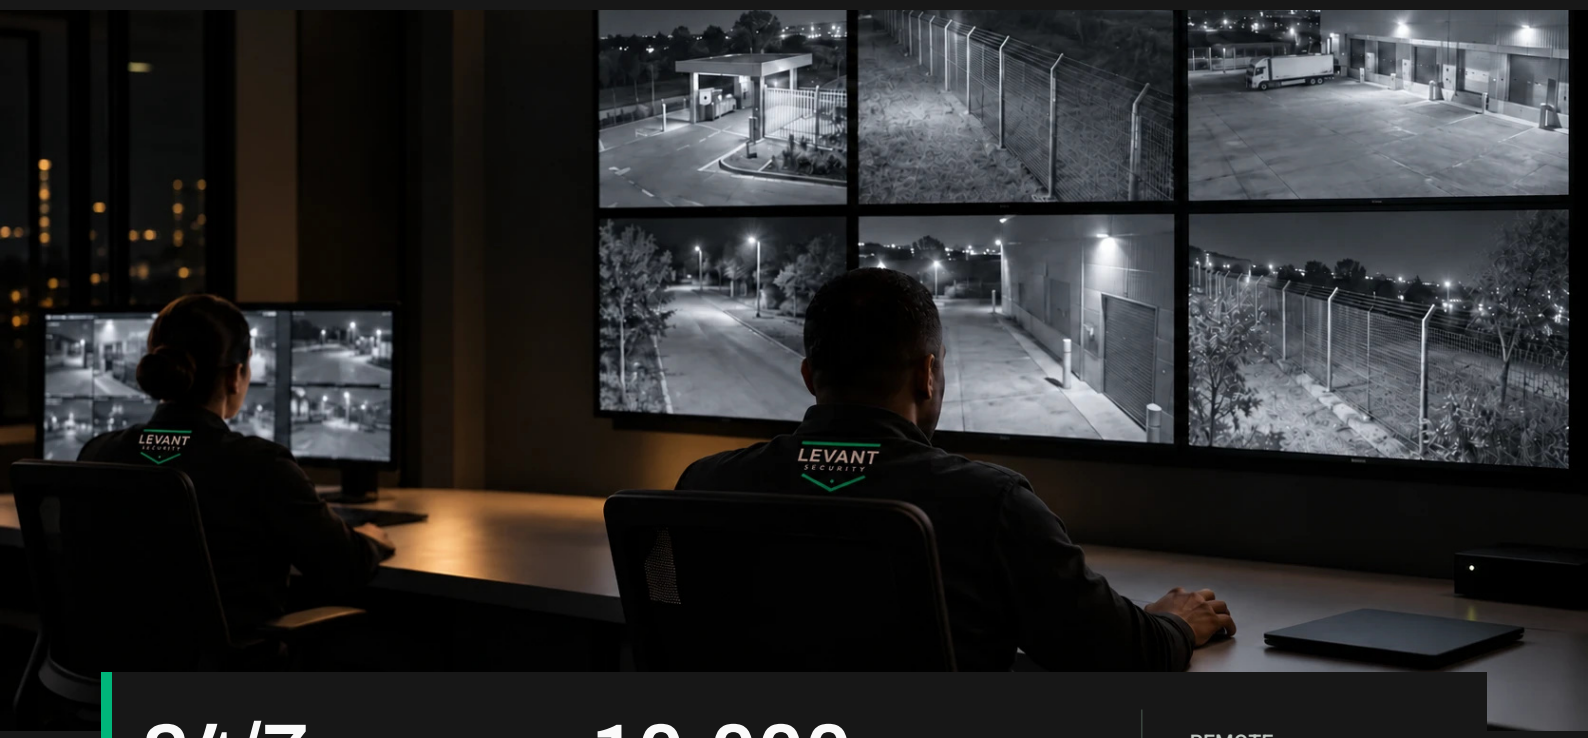

CCTV, video analytics, thermal imaging and perimeter alerts support the monitoring of your property.

Controller review

Controllers check the footage, assess the event and contact the people responsible for the next action.

Remote monitoring

Command centre support, 24 hours a day

24/7
monitoring

10,000
cameras monitored

REMOTE
OVERSIGHT

Controllers review camera activity, communicate with field teams and follow the procedure agreed for your site.

- **Detect activity** — CCTV, video alerts, thermal and perimeter monitoring.
- **Review footage** — Check the event against the site response procedure.
- **Activate response** — Controllers activate emergency response protocols and dispatch teams on the ground.
- **Report the incident** — Provide a full incident report, the action taken and recommendations.

Guarding and site protection

Personnel accreditation

Security personnel with PSIRA accreditation

Ask for the relevant registration and compliance documents for your procurement process.

Before deployment

Staffing, hours and duties are agreed before the service starts.

Access and reception

Resident, visitor, contractor and delivery checks. Reception and concierge security where required.

Patrols and supervision

Defined patrol routes, shift handovers, incident reports and escalation to the agreed contacts.

Our officers follow the specific security procedures and protocols established for your property, with 24/7 command centre support and management oversight.

Vehicle tracking and access control

Manage entry and movement

01	**Vehicle entry**	Access control and licence plate recognition.
02	**Tracking and patrols**	GPS tracking, patrol routes and fleet visibility.
03	**Vehicle alerts**	Blacklisted vehicle alerts and reporting.

Executive and specialist protection

VIP and executive protection

Close protection for executives and private clients, including travel, residential, event and escort requirements. The plan covers the person, route, venue and handover.

Critical infrastructure

Security for critical infrastructure, including National Key Points. Scope, personnel and supporting documents are confirmed for each assignment.

Security risk assessments

Assess your current arrangements

We review equipment, staffing, access routines and reporting to identify where your security plan needs attention.

Access and perimeter — Entry points, visitor routines and areas that need surveillance.

People and procedures — Staffing, patrol duties, handovers and incident communication.

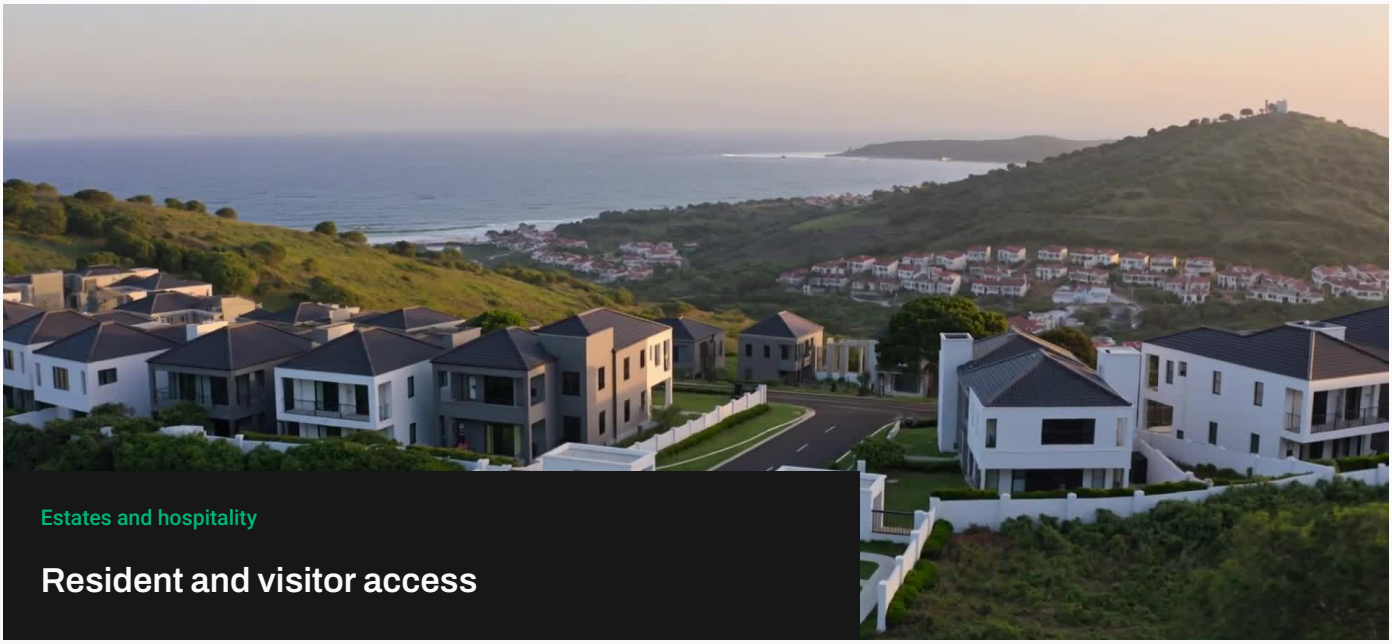

Equipment and response — Camera coverage, alerts, reporting and escalation arrangements.

Planning your security service

Tell us about your property and the security requirements you want to address. We will work through the service options with you.

01 Tell us what you need

Share the location, type of operation, current arrangements and main concerns.

02 Review the proposed service

Discuss the people, equipment, hours, access procedures and response arrangements.

03 Confirm the arrangements

Agree responsibilities, incident reporting and what is needed before the service starts.

Documents for procurement

Request current PSIRA registration details, relevant personnel documents, the proposed service scope and commercial terms.
